

PUMP FLEXES FOR SPECIALIST APPLICATIONS

TYPE :

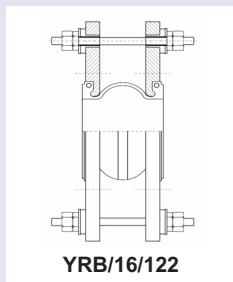

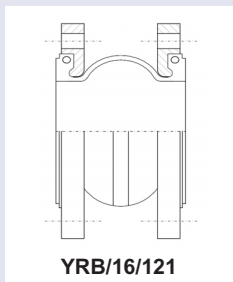

SPECIFICATION

Suitable for non-critical oil based applications (including oil contaminated compressed air) for elevated temperatures and/or pressures, a YRB unit may be more suitable. Please contact *Thermosel Solutions* for application advice.

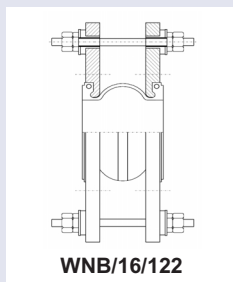

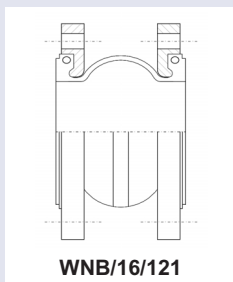

SPECIFICATION

Suitable for potable water applications up to 10 bar / 60°C and 6 bar / 80°C. Please contact *Thermosel Solutions* for application advice.

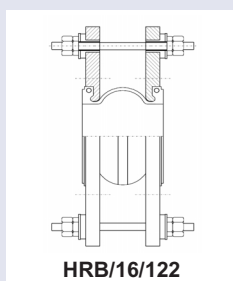

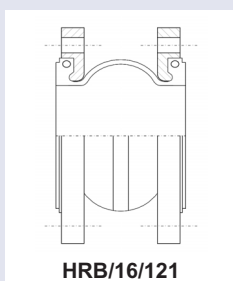

SPECIFICATION

Suitable for critical oil based applications and gas applications (not LPG). Please contact *Thermosel Solutions* for application advice.

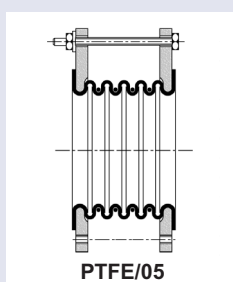

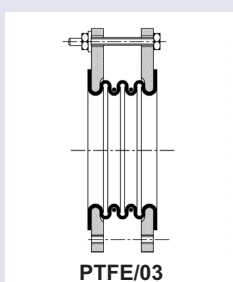

SPECIFICATION

Suitable for edible foods and liquids. Please contact *Thermosel Solutions* for application advice.

SPECIFICATION

Suitable for acids, alkalis and other chemicals. Where particularly aggressive chemicals are involved, pressure and temperature ratings are de-rated. Please contact *Thermosel Solutions* for application advice.

SPECIFICATION

Suitable for almost all specialist applications, due to inert nature of PTFE. Please contact *Thermosel Solutions* for application advice.
